Subject: Microsoft Settlement

From the handling of this case by a judge that knew so little about the subject that he had to import someone to explain it to him, to the fact that not one cent is going to those supposedly harmed, the users, it is time to put a stop to this case.

The only beneficiaries of this case are Mocrosoft's competitors who couldn't measure up to Microsoft accomplishments. If the states who would benefit from this suit can't finance their needs legitimately, let them go hunt on their own deer lease. Enough of this poaching on Microsoft's terrain.

Please put a stop to this travesty of justice now.

Thank you.
